## DETAILED ACTION

### *Claim Objections*

1. Claims 7, and 15 are objected to because of the following informalities: in claims 9 and 15, line 1, "is" should be --includes--. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-8, 10, 12-14, and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Cho et al (US Pat. 6,411,501).

Art Unit: 2835

Regarding claims 1-8, 10, 12-14, and 16, Cho et al in figures 5, and 7, discloses a structure for assembling a flat display having a flat display module 10 for displaying images with a case for fitting the flat display module therein, the structure comprising: a plurality of joining parts 15 formed at a rear surface 16b of the flat display module 10; and a plurality of conformable joining parts 27 formed in the case 30 in conformity with the joining parts 15 of the flat display module 10, the plurality of conformable joining parts 27 being engaged with the plurality of joining parts 15 in a fit manner (see column 5, lines 60-62). The joining parts 15 of the flat display module 10 are formed adjacent edges of the rear surface 16b of the flat display module 10, each of the joining parts 15 of the flat display module 10 is a recess 15, and each of the conformable joining parts 27 of the case 30 is a protrusion inserted into and fit to the corresponding recess 15 (see column 5, lines 60-62). Each of joining parts of the flat display module is a recess 15 formed along a side surface of the flat display module 10, and each of the conformable joining parts of the case is a hook 27 (see column 6, line 19) engaged with the corresponding recess 15 (see column 6, lines 9-13). The case is rear cover 30.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 2835

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9, 11, 15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Cho et al (US Pat. 6,411,501) in view of Lee (US Pat. 6,104,605).

Regarding claims 9, 11, 15, and 19, Cho et al disclose all the subject matter of the claimed inventions except for a case including a front frame and a rear cover. However, Lee teaches a case including a front frame and a rear cover (see Lee figure 5). Therefore, it would be obvious to one of ordinary skill to modify the case of Cho et al to include a front frame and a rear cover as taught by Lee in order to hold the liquid crystal display so that it can be oriented to the improved LCD cover within the computer system.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Howell et al. (US Pat. 6,411,504) teach portable computer having latching hooks.

Jung (US Pat. 6,421,231) teaches display unit and portable computer.
